Connectivity for **Manufacturing and Logistics**

Building a Solid Foundation for Modern Assembly, Warehousing and Transportation.

Manufacturing and logistics have evolved to be equal parts manual and digital. The right IT goes a long way towards keeping everything running on time and within budget.

The right IT for industry 4.0

Maintaining productivity, security and efficiency is a delicate balancing act. One wrong input can disrupt this carefully orchestrated chain. And with so much technology woven into every area – IIoT, digital twins, supply chain integrations, automated production and robotics – underpowered or ineffective IT could be that point where everything breaks down.

Segra provides manufacturers and transportation operations of all sizes, from specialized fabrication shops to massive distribution centers, with carrier-grade connectivity and networking services that can handle the heaviest workloads with ease.

More than just industrial-grade internet ...

- Fast, reliable, secure fiber internet keeps your staff and equipment connected throughout your facilities.
- Robust cybersecurity keep your network infrastructure safe from sophisticated digital threats and bad actors.
- Hosted voice services facilitate seamless supply chain communications.

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Winning Solutions That Get You More

- Internet
- DDoS Protection
- SD-WAN
- Firewall
