SEGRA®

SD-WAN

Simplified Management and Greater Network Capacity.

One user-friendly hub. Greater network traffic control and visibility. Simple, streamlined branch office networking.

Future-proof WAN management for forward-focused operations

Connecting all your locations on a secure network can be challenging. A patchwork of available connectivity often means mixing and matching private links, dedicated internet, broadband and wireless LTE.

Segra SD-WAN centralizes and streamlines multisite WAN management, delivering enhanced visibility on a single pane of glass, saving you time and resources that can be directed toward your strategic business initiatives.

Diverse connectivity options, automatic failover management and application prioritization ensure secure, reliable performance across network and cloud locations.

Benefits

- **Simple, Secure Network:** This turnkey solution allows you to quickly deploy a simplified network design that includes encryption, monitoring and centralized troubleshooting tools

- **Optimize Application Performance:** The centralized web interface allows you to allocate your available bandwidth to applications that are crucial to your business.

- **Reduce Cost:** Save on expensive hardware installations and help control costs associated with various ISPs serving your branch office(s).

- **Path Selection:** Employs intelligent path control to optimize traffic paths

- **Content Filtering:** Cloud-based threat intelligence, malicious websites

Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology — it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

More than just streamlined branch networking ...

- Monitor end-to-end health of web applications at a glance across the LAN, WAN and application server.

- Unmatched security supported by end-to-end encryption and real-time monitoring and alerts.

- Automatic routing and traffic prioritization that ensures optimal network and application performance.

- Reliable and consistent performance over diverse WAN connection types

Let's Create Winning Connections Together.
