SEGRA®

Dedicated Internet Access

High-speed connectivity to the Internet is a must-have for your IT systems and your presence with customers. Don't slow your business down with Internet access that's shared, congested, unpredictable and not secure. Segra Dedicated Internet Access (DIA) provides a dedicated, secure, reliable connection to the Internet that has guaranteed bandwidth.

Your site is connected to the Segra Internet PoP by a local access loop. The bandwidth on the loop is dedicated, not shared across many users, which preserves your Internet connection speed since there is no competition for the bandwidth.

Customer Benefits

Dedicated Access
Your bandwidth connection to the Internet is not shared, giving you reliably fast access to the web.

Synchronous Upload and Download Speeds
With Segra DIA, Internet upload and download speeds are the same, enabling the consistent access performance needed for online transactions to complete quickly.

Bandwidth Scalability
DIA bandwidth can be increased as your Internet access needs grow.

Multi-Service Support
The DIA connection can support other network services, providing a single network for your telecommunication needs. In addition, interoffice traffic can be separated from Internet traffic for security purposes.

Multi-Site Support
DIA can connect multiple sites to bring current and future locations online.

Carrier-Class Service Level Agreement (SLA)

Specifications

- Speeds - 10 Mbps to 100 Gbps
- Ports - 10/100 Mbps, 1 Gbps, 10 Gbps, 100 Gbps
- Access - Type 1/on-net or Type 2/off-net access
- Availability - Across the entire Segra networkt

Let's create winning connections together.
