

Express Cloud Connect

A faster, safer, more reliable way to connect to the cloud.

There are many ways to get to the cloud. “Best efforts” internet might sound good enough for some, but is it actually good enough for the applications and systems you rely on?

Direct WAN-to-cloud access means no congestion or competition

Cloud-deployed systems enhance performance, security, and continuity significantly. A potential vulnerability may emerge within your IT infrastructure. Dependence on public internet cloud access for mission-critical and high-performance applications can significantly hinder performance and lead to user frustration.

Segra Express Cloud Connect provides a secure, high-speed pathway that completely avoids the public internet, ensuring a direct connection from your network to your cloud. The performance and security concerns associated with a shared connection are addressed, enabling you to maximize the potential of your cloud endpoints. This guarantees a dependable and effective connection for your essential business functions.

With Segra’s dedicated pathways, ensure peak uptime and responsiveness. Maximize productivity and seamless integration with our powerful Cloud Connect solution.

More than just a secure route to the cloud ...

- A dedicated, performance-assured connection between your network and cloud locations boosts productivity and security.
- Flexible and scalable connections adapt as your network needs and business goals change.
- Multi-CSP connectivity means you can access all your preferred cloud providers.

Why Segra?

At Segra, we understand that winning in today’s business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

Specifications

Speeds up to 10 Gbps

Available CSPs*

- Amazon Web Service (AWS)
