

# Metro Ethernet

## E-LAN (Multi-Point-to-Multi-Point)

Delivered over Segra's carrier-grade, 100% fiber-optic network

**Seamless connectivity. Enhanced scalability.**  
**Incredible flexibility. Proven reliability.**

E-LAN is a Layer 2 port-based private and dedicated Ethernet transport service connecting multiple sites in an any-to-any (multi-point-to-multi-point) configuration.

Designed for customers who pass traffic from site to site without the need to route through a primary hub location.

With a high-speed Ethernet connection, your business can experience the unsurpassed performance and reliability for your mission-critical data applications.

### More than just a scalable, enterprise-grade private network...

- 100% fiber-optic infrastructure
- Custom designed circuits to meet specific requirements
- Dedicated and symmetrical bandwidth
- Access ring protection and route diversity options
- Carrier-grade equipment deployed at a customer's physical location
- Connection options range from 10 Mbps to 10 Gbps

### Why Segra?

At Segra, we understand that winning in today's business landscape requires more than just technology – it requires a strategic connectivity game plan, relentless agility and innovation, and a human touch.

We invest in our customers, our network and our people to deliver exceptional connectivity solutions and customer service that empower businesses to thrive.

Our local-market operating model means your whole team – from sales to network engineering to customer support – are all living and working in the communities they serve.

### Specifications

- **Any-to-Any Connectivity:** Provides seamless connections for easy communication between multiple sites.
- **Highly Flexible:** Supports dynamic bandwidth adjustments to accommodate changing business needs.
- **Enhanced Collaboration:** Enables real-time data exchange and collaboration across all locations.

Create Winning  
Connections  
Together.
